Leading the Way In Wire Processing Equipment

DTi

DTI is one of the only manufactures to completely restore and rebuild wire drawers, turntables, uncoilers, flippers, mechanical descenders, roll cut straighteners, straighten and cut machinery. If you are in the market for new equipment, we have you covered but if you have you old equipment, do not scrap. We will offer cash or trade. But if you want to deliver sustainability, let us rebuild your next piece of equipment. With over 50 years of experience a machine will look and function like new.

DTI REBUILD

- Any brand of in-line wire drawer
- Ground up rebuild including sand blast and paint
- Conversion from mechanical or hydraulic to AC inverter drives
- Full automatic speed control
- New electrics and pneumatics components
- Capstans re-cut or replaced
- Speed and horse power modifications

THE PROCESS OF REBUILD

- Clean and Strip
- Sandblast
- Paint
- Disassemble
- Rewire
- CNC new parts
- Install new gear box
